The Scenario

Terraform Components

Terraform Executable

Terraform File

```
variable "aws_access_key" {}  
variable "aws_secret_key" {}
```

```
provider "aws" {  
    access_key = "access_key"  
    secret_key = "secret_key"  
    region = "us-east-1"  
}
```

◀ Variables

◀ Provider

```
resource "aws_instance" "ex" {  
    ami = "ami-c58c1dd3"  
    instance_type = "t2.micro"  
}
```

```
output "aws_public_ip" {  
    value =  
        "${aws_instance.ex.public_dns}"  
}
```

◀ Resource

◀ Output

Demo

Examine the Terraform file

Deploy the configuration

Review the results

Play along!

- AWS account
- Demo files

Some of the resources
deployed in AWS may cost
money. You've been
warned.

Summary

Key components of a Terraform file

Deploying infrastructure

- Repeatable
- Consistent

Coming up

- Adding resources
- Planning updates
- Conquering the world?
